GRANTS

UKRAINIAN REFUGEE RELIEF

DONATE

Small grants

The small grants program is the primary focus of The Friends of Moldova. We aim to further empower Moldovan-driven initiatives by providing grants to projects relating to civil and youth activists plus social entrepreneurship. This program is solely made possible by the contributions of our donors and members. To make your contribution towards our next project finalist(s), click on the Donate button below to make your donation.

DONATE

Ukranian Refugee Activities

Moldova, Ukraine's neighbor, has opened its home to Ukrainian refugees. With more per capita Ukrainian refugees than any other country, local Moldovan hosts and Ukrainian refugees need our assistance. Our connections with the many organizations and people in Moldova have put us in a position to significantly contribute to aid those that need support from this war. In 2022, we distributed \$945,081.32 in direct support to over 85,000 Ukrainian refugees.

DONATE

NFTs as perks for donations

<https://peaceofheart.eu/#nft-peace-of-heart-collection>

Non-Fungible Tokens (NFTs) are digital asset that represents ownership of a unique piece of artwork, music, or video.

NFT Peace of Heart Collection

All the funds raised through the online charity event will be donated to the Ukrainian war victims, and everyone who supports the fundraising effort will receive a unique NFT. The initiative was created by a group of organizations, including Polish Humanitarian Action (PAH), an NGO that provides wide-ranging, on-the-ground support to victims of crises worldwide.

About us

Tech To The Rescue
is a platform that matches
Non-profits with **Tech**
Companies to build digital
solutions that can scale up
their impact.

It's possible thanks to Partners

We exist and make impact thanks to generous support from the members of our Changemaker Empowerment Alliance.

All services at TTTR are free and aimed at multiplying impact of Non-profits we support.

You can make a difference by implementing solutions for changemakers or joining the Alliance and co-creating the movement donating substantive resources (experience, time, money)

Thank you for your attention. I'd love to discuss details and answer questions!

Join us on a mission to empower changemakers with access to technology solutions to help save the planet for our children and future generations
